Trotskyist Pamphlet – How America and Europe privilege Capital and how Communism privileges uneven strikes.

By Shomit Sirohi

Introduction

A quote from Trotsky in recent writings “So then insurrection is valid, and means strikes, and then I call it in fact also

a mass line, I mean though let us then retire to avant-garde lives, it is just the nature of art, I mean art is important, the art of surrealism – I mean when things go well and beautiful for surreal things – like a woman and a man in love – they laugh off all problems – I call this surrealism and politics.”

I. Uneven Development and

> class struggle as a pattern which then fuses and joins and disjoins

In fact uneven development develops a poverty and even a poor, which then fuse and mass agitate. One argues this is a mass politics. It means that it is assemblies and fused groups, which then in fact win their wage. The poorest. The fact of

labour then is how labour is in the sense of labour a task, a wage, and a labouring process.

II. Combined Aspects

And then comes the combined aspects, which is about the combined capital, and bureaucratic capital in Cuba and better in Algeria and in China. Capital is a process of accumulation of profit

and its dynamics of creativity.

III. News

I argue Europe is more towards the combined aspect, though also has peasant strikes.

Cuba is combined in bureaucratic capital and is also about uneven development – currently on city development with Algeria.

IV. Health in My View

Hegel argues "phenomenology" that is all. And that then works out when it is well lived, I also mean it solves when it is happiness. I mean my own condition of crisis recently is solved by the process of phenomenology – I mean for Hegelian reveries – see it turn upward and happy as a

graph, the upsets are just contingent and mainly that in Hegel’s view, which also become very irrelevant.
